Casa Citrohan (1920 - 1922)

海明威

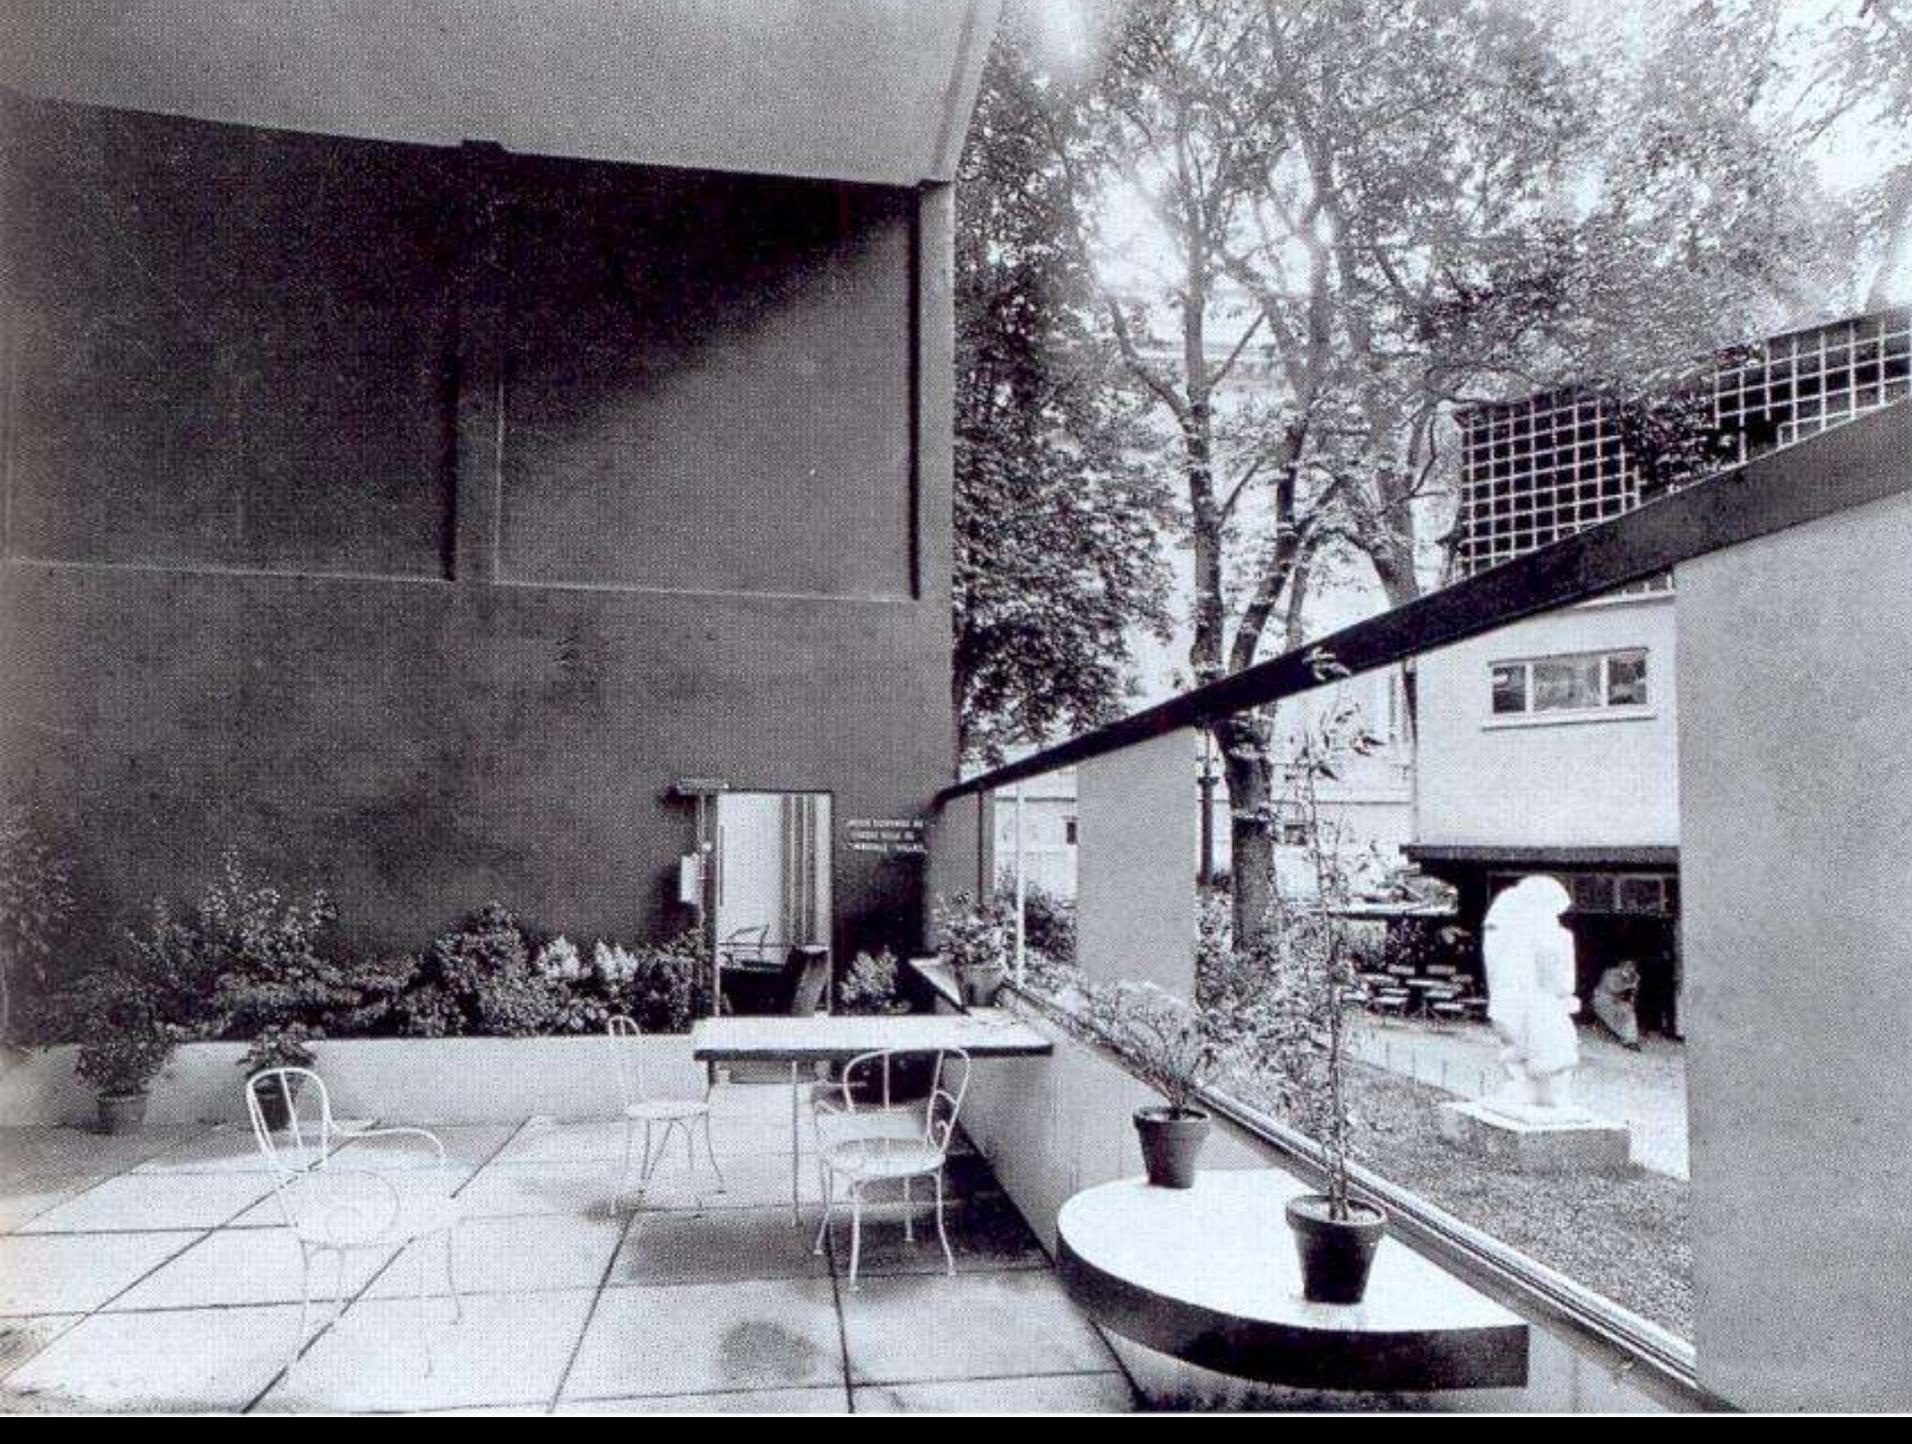

“Incasellamento e disprezzo dell’uomo caratterizzano le nostre mediocri scatole d’affitto, mal isolate acusticamente, affacciati sul tumulto della strada e sul suo terrore meccanico, mortale nemico dei bambini. Molti credono di poter compensare il logorìo dei nervi ed i mille disagi della vita cittadina andando ad abitare in casette di periferia. Questo bisogno d’evasione è legittimo ... ma in che cosa si traduce, nei fatti, questa evasione? Nell’anarchica proliferazione di sobborghi che corrodono la natura e degradano le belle comunità rurali, nelle spese vertiginose (trasporti pubblici, rete stradale, condutture, comunicazioni, etc.) che il malsano rigonfiamento delle nostre città comporta per lo Stato. Questo enorme spreco – la disorganizzazione del fenomeno urbano – costituisce uno degli oneri più schiacciati imposti alla società moderna”
